

INDEPENDENT ASSURANCE REPORT

To: The Stakeholders of Ametek, Inc.

1. Introduction and Objectives of Work

Bureau Veritas UK Ltd (“Bureau Veritas”) has been engaged by Ametek, Inc. (“Ametek”) to provide limited assurance of its Scope 1 and Scope 2 Greenhouse Gas (GHG) Emissions from its global operations. The objective is to provide assurance to Ametek and its stakeholders over the accuracy and reliability of the reported information and data.

2. Scope of Work

The scope of our work was limited to assurance over the following (“Subject Matter”) for the period 1st January 2024 to 31st December 2024 (the ‘Selected Information’):

- Scope 1 GHG emissions (MTCO₂e);
- Scope 2 GHG emissions – Market-based and Location-based (MTCO₂e), and
- Total energy (MWh).

3. Reporting Criteria

The Selected Information has been prepared in accordance with definitions set in Ametek’s internal GHG Inventory Management Plan. Ametek considers that the Inventory Management Plan is largely aligned with the Greenhouse Gas Protocol Corporate Standard. The Selected Information needs to be read and understood together with the Inventory Management Plan footnotes and commentary included in the table in the conclusion section.

4. Limitations and Exclusions

Excluded from the scope of our work is assurance of information relating to:

- Activities outside the defined assurance period;
- Positional statements of a descriptive or interpretative nature, or of opinion, belief, aspiration or commitment to undertake future actions; and
- Other information included in the Subject Matter other than the Selected Information.

The following limitations should be noted:

- This limited assurance engagement relies on a risk based selected sample of sustainability data and the associated limitations that this entails.
- The reliability of the reported data is dependent on the accuracy of metering and other production measurement arrangements employed at site level, not addressed as part of this assurance; and
- This independent statement should not be relied upon to detect all errors, omissions or misstatements that may exist.

5. Responsibilities

The preparation and presentation of the Selected Information relating to the Subject Matter are the sole responsibility of the management of Ametek.

Bureau Veritas was not involved in the drafting of the information contained in the Subject Matter or of the Reporting Criteria. Our responsibilities were to:

- obtain limited assurance about whether the Selected Information has been prepared in accordance with the Reporting Criteria;

- form an independent conclusion based on the assurance procedures performed and evidence obtained; and
- report our conclusions to the Management of Ametek.

6. Assessment Standard

We performed our work to a limited level of assurance in accordance with ISO 14064-3:2019 Greenhouse gases — Part 3: Specification with guidance for the verification and validation of greenhouse gas statements and ISO 14064-1:2018 Greenhouse gases - Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals.

7. Summary of Work Performed

As part of our independent assurance, our work included:

1. Reviewing the data collection and consolidation processes used to compile Selected Information, including assessing assumptions made, and the data scope and reporting boundaries;
2. Reviewing documentary evidence provided by Ametek;
3. Agreeing a selection of the Selected Information to the corresponding source documentation;
4. Reperforming aggregation calculations of the Selected Information;
5. Reviewing Ametek's systems for quantitative data aggregation and analysis;
6. Reperforming greenhouse gas emissions conversions calculations; and
7. Comparing the Selected Information to the prior year amounts taking into consideration changes in business activities, acquisitions and disposals.

A 5% materiality threshold was applied to this assurance. It should be noted that the procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

8. Conclusion

On the basis of our methodology and the activities and limitations described above, nothing has come to our attention to indicate that the Selected Information is not fairly stated in all material respects. The following data has been verified:

| Scope | Total 2024 |
|---|-------------------------------|
| Scope 1 GHG Emissions ¹ | 29,745.54 MTCO ₂ e |
| Scope 2 GHG Emissions – Market-Based ² | 92,195.73 MTCO ₂ e |
| Scope 2 GHG Emissions – Location-Based | 99,474.22 MTCO ₂ e |
| Total Energy | 418,228.70 MWh |

¹ Scope 1 includes a carbon footprint comprised of emissions from stationary combustion (natural gas, diesel, petrol, fuel oil, propane), fleet (diesel and petrol), and refrigerants.

² Scope 2 includes a carbon footprint comprised of emissions from electricity, district heating, and retiring Renewable Energy Certificates (RECs) within Ametek's portfolio for facilities and equipment. Scope 2 emissions were calculated in accordance with a dual reporting technique by adopting location-based and market-based methodologies set out in the GHGs Protocol's Scope 2 Guidance Standard.

9. Statement of Independence, Integrity and Competence

Bureau Veritas is an independent professional services company that specialises in quality, environmental, health, safety and social accountability with over 190 years history. Its assurance team has extensive experience in conducting verification over environmental, social, ethical and health and safety information, systems and processes.

Bureau Veritas operates a certified³ Quality Management System which complies with the requirements of ISO 9001:2015 and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards, quality reviews and applicable legal and regulatory requirements which we consider to be equivalent to ISQM 1 & 2⁴.

Bureau Veritas has implemented and applies a Code of Ethics, which meets the requirements of the International Federation of Inspections Agencies (IFIA)⁵, across the business to ensure that its employees maintain integrity, objectivity, professional competence and due care, confidentiality, professional behaviour and high ethical standards in their day-to-day business activities. We consider this to be equivalent to the requirements of the IESBA code⁶. The assurance team for this work does not have any involvement in any other Bureau Veritas projects with Ametek.
