

SUSTAINABILITY AT AMETEK

AMETEK[®]

2019 Sustainability Report

WHAT DRIVES SUSTAINABILITY AT AMETEK

At AMETEK, we believe in building a sustainable future for our shareholders, colleagues, customers and suppliers, and the communities where we operate.

To us, sustainability is a commitment to do the right thing in all facets of our company, while delivering strong, consistent and profitable growth. We are pleased to have the opportunity to share this report with you, which is divided into four main sections summarized below.

Sustainability at AMETEK starts with **Our Core**, which includes strong values, sound corporate governance and detailed oversight of compliance and risk management. These core elements result in a deep-rooted company culture that unites all of AMETEK's colleagues in the common spirit of collaboration, creativity and innovation to *solve our customers' most complex challenges with differentiated technology solutions*. Our core is the critical starting point for our commitment to a sustainable business strategy.

Our Strategy, embodied in the AMETEK Growth Model, is proven, scalable and sustainable.

The AMETEK Growth Model's success is driven by our keen focus on Operational Excellence, New Product Development, Global and Market Expansion, and Strategic Acquisitions – with a disciplined approach to Cash Generation and Capital Deployment. Central to the AMETEK Growth Model is an emphasis on Talent Development. Together, these provide a platform for long-term, sustainable growth.

Our People drive our success. Our distributed, performance-driven culture means we rely heavily on our diverse teams to execute our strategy and embrace our values by doing the right thing every day, in every interaction. We are committed to providing safe and healthy working conditions, and continued professional development opportunities, as well as inclusive environments where our colleagues' ideas are valued. We are also committed to improving the communities where we work and live.

Finally, **Our Solutions** are making the world a better place. Many of our solutions provide sustainability-related benefits such as improved health care outcomes, food and pharmaceutical safety, and safeguarding the environment. Supporting these solutions are deep customer relationships, leading technology innovation, a global manufacturing footprint, a flexible supply chain and socially responsible processes.

We believe the story of sustainability at AMETEK *is* a growth story, and we appreciate this opportunity to share it with you. Your feedback is welcome, and we look forward to continuing this journey together.

ABOUT AMETEK

AMETEK's world-class businesses support a broad set of customers through a robust portfolio of differentiated technology solutions. These solutions serve many niche markets around the globe, while addressing important, long-term growth trends impacting the world economy.

Our growth initiatives focus on expanding our presence and capabilities across these attractive growth areas.

AMETEK consists of two operating groups: Electronic Instruments Group (EIG) and Electromechanical Group (EMG).

EIG is a worldwide leader in the design and manufacture of advanced analytical, test and measurement instrumentation for aerospace, medical, power, energy, research and industrial markets.

EMG is a differentiated supplier of automation and precision motion control solutions, as well as highly engineered electrical interconnects, specialty metals and thermal management systems.

AMETEK is a leading global provider of electronic instruments and electromechanical devices with more than 18,000 colleagues at 150+ operating locations and a global network of sales, service and support locations in 30 countries around the world. The company has been listed on the New York Stock Exchange (NYSE) since 1930 and is headquartered in Berwyn, Pennsylvania.

OUR CORE

Our Core Values

- *Ethics*
- *Integrity*
- *Respect for the Individual*
- *Diversity*
- *Teamwork*
- *Social Responsibility*

Our Core combines a strong set of values with sound corporate governance and detailed oversight of compliance and risk management. These foundational elements, which have guided the company since our founding in 1930, create the building blocks for a sustainable organization and will remain constant through our future.

Strong values, sound governance and detailed oversight of compliance and risk management are the foundation for a sustainable organization.

Our core provides a unique company culture that unites AMETEK's colleagues across the globe. This common understanding of doing what is right for our shareholders, colleagues, customers, suppliers and communities strengthens AMETEK's collaborative, creative, performance-based culture, driving our organization to new heights.

AMETEK's global scale and distributed business structure provides meaningful opportunities for our colleagues to broaden their skill sets. Our diverse, world-class workforce fosters new ways of thinking and helps drive innovation. We strive to be a nimble organization that is team-oriented and collegial, with employees working together to solve our customers' most complex challenges. We are dedicated to maintaining the core of our business while continuing to grow as a sustainable company.

Strong Values

At AMETEK, we believe that our strong core values — ethics, integrity, respect for the individual, diversity, teamwork and social responsibility — are essential to doing business the right way. We expect management and our colleagues to conduct themselves with the highest level of ethical behavior and integrity in every interaction. At AMETEK, we work together in collaborative, diverse teams and our colleagues have deep respect for one another. We strive to make a meaningful, positive impact in our communities and operate with a high level of social responsibility.

AMETEK's Code of Ethics and Business Conduct reflects what our stakeholders can expect of the organization, including its Board of Directors, officers and employees. The Code, along with AMETEK's internal policies and procedures, outlines expectations for fair, honest and safe interactions, both internally and externally. Many of our policies and procedures go beyond legal requirements to embrace social responsibility and good corporate stewardship.

Management is responsible for assuring compliance with the Code as well as our internal policies and procedures, and that the appropriate controls are in place to monitor our compliance. In addition, AMETEK's businesses operate in accordance with applicable laws and regulations and support AMETEK's ethical approach. This is further supported by AMETEK's open communication between our colleagues and management. We encourage our teams to report any concerns regarding conduct, policy violations, financial matters, safety issues or other topics directly to their managers, Human Resources or anonymously through the AMETEK Hotline.

Sound Governance

AMETEK's future depends on the actions we take today. Sound corporate governance is key to enabling responsible decision-making at the highest levels of the organization. This leads to accountability and promotes public trust.

AMETEK's Board of Directors and its committees play several important governance roles.

These roles include working with management to set the company's strategy; evaluating the performance and determining the compensation of our Chief Executive Officer; approving compensation for all other executive officers; and overseeing our risk management programs.

The Board is currently composed of nine directors, including three women. Eight of our nine Board members are independent directors as defined by the NYSE. The Board's Audit, Compensation, and Corporate Governance/Nominating Committees each consist entirely of independent directors. Director nominations are made by the Corporate Governance/Nominating Committee.

Additional details on the Board, its committees and their functions can be found in AMETEK's Corporate Governance Guidelines and in our annual proxy statement. Committee charters can also be found at investors.ametek.com.

AMETEK Corporate Governance Highlights

We have a lead independent director to chair meetings of the independent directors and act as a liaison between the independent directors and our Chairman and CEO.

We have independent, experienced committee chairpersons.

Our Board includes three female directors.

A majority vote is required for the election of directors in uncontested elections.

Proxy access is permitted for a shareholder, or a group of up to 20 shareholders owning at least 3% of our common stock for at least three years, to submit director nominees.

All members of our Audit Committee are considered financial experts.

We have robust stock ownership guidelines for our Board and senior management.

Executive compensation is benchmarked annually by a third party and is designed in a manner to not promote excessive risk taking.

The Board undertakes an annual self-evaluation process.

Compliance and Risk Management Oversight

One of the primary roles of AMETEK's executive leadership team and the Board of Directors is to assess and mitigate the various risks associated with our businesses.

To that end, AMETEK has designated an Enterprise Risk Management (ERM) committee that meets quarterly with the goal of maximizing the company's ability to achieve its business objectives. The committee, made up of a cross-functional team including ERM experts and senior business leaders, helps achieve this vision by creating a comprehensive approach to anticipate, identify, prioritize and manage material risks to our organization. Enterprise risk includes any significant event or circumstance that could impact the achievement of our business objectives, including strategic, operational, reporting, compliance and reputational risks.

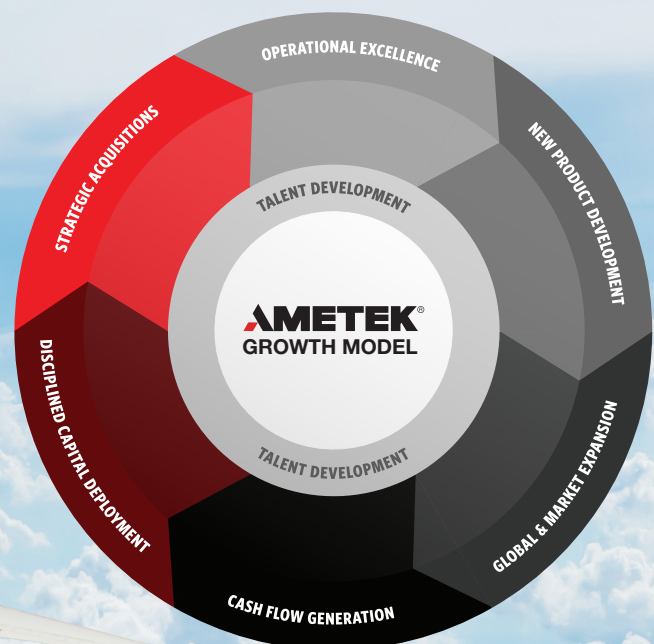

The primary responsibility of the ERM committee is to ensure that sound policies, procedures and practices are in place for the enterprise-wide management of the company's material risks. The committee is also responsible for reporting results of these activities to the Board of Directors and its Audit Committee. While AMETEK's Audit Committee has primary responsibility for overseeing risk management for AMETEK, our entire Board, and each committee of the Board, plays an active role in risk management activities. The Audit Committee receives quarterly reports from AMETEK's management team and the entire Board receives a risk management update at least annually. Risk management focus areas include, but are not limited to:

- **Cyber Security**
- **Response to Natural Disasters**
- **Country Concentration Risk**
- **Geopolitical Risk**
- **Product and Technology Risk**

As an element of ERM oversight, AMETEK and our Board of Directors are committed to legal, regulatory and environmental compliance. Within this framework, we have developed a robust set of internal policies and procedures, which are made available to all employees to help monitor and manage compliance across our enterprise.

OUR STRATEGY

Our Strategy, embodied in the AMETEK Growth Model, has been proven successful, leading to strong, sustained growth and increased value for all of AMETEK's stakeholders.

The AMETEK Growth Model integrates the four growth strategies of Operational Excellence, New Product Development, Global and Market Expansion, and Strategic Acquisitions with a focus on cash generation and capital deployment. Talent development is central to the AMETEK Growth Model, with our people as the driving force of our strategy. Each foundational element reinforces the others to create a greater impact, which provides a scalable platform to drive long-term, sustainable growth for our entire organization.

The success of the AMETEK Growth Model is a result of the deep-rooted, performance-based culture embodied by AMETEK. That culture is maintained and reinforced by attracting, retaining and developing a world-class workforce across our global footprint. All of AMETEK's colleagues are responsible for embracing and executing the AMETEK Growth Model within their function.

The idea of sustainability is not a new concept for AMETEK. Since the company's founding in 1930, we have been dedicated to doing business the right way every day. By focusing on our businesses and the needs of our customers, we generate strong, sustained results over the long term. This allows us to invest in our people, our businesses and our shared communities. This is our view of sustainability.

The AMETEK Growth Model drives our sustainability.

Operational Excellence

As the cornerstone of the AMETEK Growth Model, Operational Excellence is a key component of the company's well-ingrained culture. We continue to drive process improvements for our businesses through the use of our Operational Excellence tool kit. These strategies provide improved efficiencies and asset management, leading to strong operating performance.

Strategic Acquisitions

Acquisitions are an important part of AMETEK's history, and its future. AMETEK seeks to deploy its strong free cash flow on highly differentiated businesses with leading positions in niche markets. We look to create significant value by successfully integrating our acquired businesses into the AMETEK Growth Model, driving increased performance and long-term, sustainable results.

New Product Development

Technology innovation is an integral component of AMETEK's success. We consistently invest in research, development and engineering to design next-generation products and solutions that are solving our customers' most complex challenges across the globe. Over the years, our product innovation has led to a portfolio of advanced, highly differentiated technology solutions serving a diverse set of niche markets.

Global and Market Expansion

With operations in 30 countries worldwide, AMETEK is a global enterprise. Through increased investments in improved sales, service and marketing capabilities, we have significantly grown our international business and greatly expanded our reach into adjacent markets.

Cash Flow Generation

Given our asset-light business model and strong operational execution, our businesses generate tremendous cash flow.

Disciplined Capital Deployment

AMETEK's cash flow generation supports the company's capital deployment strategy. This strategy is primarily focused on strategic, value-enhancing acquisitions, which ultimately drives long-term, compounding growth. We are also committed to paying a modest, yet consistent quarterly dividend.

OUR PEOPLE

At AMETEK, we are committed to the health, safety and well-being of Our People. Built on our strong foundation of ethical business practices, this commitment extends to our more than 18,000 AMETEK colleagues around the world, their families and those in the communities where we live and work. At AMETEK, we recognize that our people are the driving force behind our sustainable future.

Health and Safety

AMETEK's management has a strict, unwavering focus on the safety of our employees. To this end, we aim to build a health and safety culture where:

- *Employees come to work and return home safely each and every day.*
- *Zero accidents in the workplace is our ultimate goal.*
- *All levels of management are fully involved with safety and held accountable.*
- *Continual safety improvement is driven by committed employees who are engaged at all locations.*

AMETEK's Environmental Health and Safety (EHS) function is responsible for the programs, policies and procedures that help protect both our colleagues and the people in our communities. The EHS team is comprised of leaders within our corporate office and facility managers at each of our operating sites. Collectively, the team manages numerous health and safety areas of focus as part of our EHS initiatives.

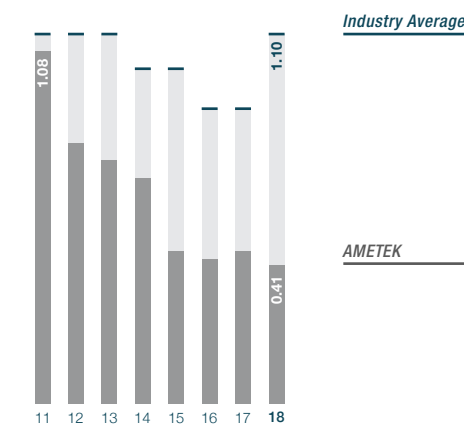

The focus areas are tracked and monitored through continual, on-site facility audits. Audit results and EHS metrics are communicated to management on a monthly basis.

AMETEK's Foundation for Health and Safety Excellence

Lost Workday Incident Rate

(per 100 workers, per year)

82 Sites with Zero Lost-Time Incidents in 2018

We continue to drive toward our goal of zero lost-time work incidents. Our 2018 lost-time incident rate was the lowest ever and we continue to enhance our safety initiatives as each facility is tasked with identifying opportunities for additional safety measures. Businesses with zero incidents share best practices and ensure ongoing training to maintain their safety excellence. In addition to our EHS facility audits, our facilities' activities include safety committees, continual training, documented self-audits, and behavior-based safety observations and feedback.

EHS Policy Statement Establishes the Expectations

In addition to our focus on health and safety, we are also committed to improving our processes and solutions with a focus on compliance, safety and environmental consciousness. In that spirit, and to ensure alignment across our footprint, we have established the following expectations of our businesses as outlined in AMETEK's EHS Policy Statement:

- *Meet or surpass the requirements of EHS laws and regulations wherever we do business around the world.*
- *Educate, empower and expect all our colleagues to behave in ways that protect the environment and make health and safety a priority.*
- *Strive continuously to improve the efficiency of our operations to minimize both the use of materials and the generation of waste.*
- *Operate our facilities in a responsible and cooperative fashion in the communities where they reside.*
- *Continuously improve our EHS systems.*

Talent Acquisition and Development

At AMETEK, we believe that a talented, engaged and dynamic workforce is vital to our success.

We seek to hire, develop and retain individuals who embrace and thrive in our performance-based, entrepreneurial culture.

AMETEK's distributed business model allows our employees to bring varied, complementary experiences to their roles. We are united by our common spirit of collaboration, creativity and innovation, backed by the power of a large, global company.

Our businesses strive to build robust talent pipelines through targeted recruitment initiatives across our 30-country geographic footprint. Our programs ensure seamless onboarding for our new employees. We identify and nurture talent through a culture that enables employees to succeed and grow into leadership positions. AMETEK's diverse businesses and distributed structure provide many opportunities for employees to follow their own path and advance their careers.

We have a comprehensive leadership development process that identifies the next generation of AMETEK's leaders and promotes proper succession planning across our businesses. This process includes monthly leadership development meetings with the executive team, as well as annual leadership reviews with each AMETEK business.

We have several programs specifically designed to ready our employees for future leadership roles:

AMETEK University:

This event allows business managers and high-potential employees, nominated by the leadership group, to learn about AMETEK's history, culture and processes as well as collaborate in group exercises.

Center for Creative Leadership®:

AMETEK partners with the Center for Creative Leadership to provide our rising leaders with highly focused, off-site training sessions. The partnership also provides access to online leadership training programs and research to help participants hone their skills on a continual basis.

Financial Management Program:

This program offers recent finance and accounting graduates a three-year, immersive experience in which they develop leadership skills through rotational field assignments, classroom training and networking events. Successful completion of the program prepares them for future leadership roles within AMETEK's finance functions.

By investing in world-class talent, improving the performance of our businesses and committing to positively impacting our customers, we experience an 85% workforce retention rate — among the highest in our industry.

Diversity and Inclusion

Diversity is a core value at AMETEK and a critical focus area across all levels of the company.

At the highest level, AMETEK's Board is comprised of directors with diverse skills, backgrounds and experiences. Additionally, 33% of our current directors are women, one of the highest levels in our industry. This structure promotes healthy conversation and different perspectives on our company's future, which permeate throughout the entire organization.

Given the company's global nature and diverse customer base, we seek to promote a strong balance across our workforce by implementing programs to increase the number of women and minorities in various functions throughout the organization.

We are also committed to creating an inclusive environment for our colleagues. Since 2018, more than 3,000 AMETEK managers have participated in unconscious bias training to learn how to identify and address implicit bias that may affect team performance and chemistry. The course covers techniques for hiring and leading diverse teams. Additionally, AMETEK has taken a company-wide approach to providing training for its employees that fosters a respectful and inclusive work environment.

Community Impact

AMETEK is dedicated to good stewardship in the communities where we work and live.

Along with operating as a responsible neighbor, we actively encourage our employees to make a positive impact through volunteer events and financial support from the AMETEK Foundation.

Established in 1960, the AMETEK Foundation is the company's charitable arm that empowers our colleagues to make a positive impact in their local communities. We encourage our employees to apply for grants that support the charitable organizations where they have donated their time, talents and

financial contributions. Often, these organizations make a direct impact in the local communities where we operate, which provides a broad, global reach. Since 2016, the AMETEK Foundation has made donations to more than 190 charitable organizations around the world.

Initiatives that are supported by the AMETEK Foundation include those that promote health and welfare; civic and social service programs; and education — specifically with a focus on science, technology, engineering and math (STEM) fields for underserved students.

Volunteerism in Our Communities

The AMETEK Foundation and the company also support AMETEK's employees in their volunteer efforts. In recent years, AMETEK colleagues from across our global footprint have hosted and participated in unique volunteer initiatives that directly connect with our mission. A few examples include:

In 2019, colleagues at AMETEK's corporate office volunteered with The First Tee of Greater Philadelphia, a youth development organization that positively impacts the lives of more than 21,000 children through the game of golf. The AMETEK team helped rehabilitate the organization's home course, where it hosts events and camps that teach kids nine core values: Honesty, Integrity, Sportsmanship, Respect, Confidence, Responsibility, Perseverance, Courtesy and Judgment.

AMETEK India employees volunteer and donate to PRERANA's Nurture Merit Program, which provides financial aid to meritorious students from underprivileged backgrounds in Pre-University (PUC) 1st Year (11th grade) up to college and professional degree programs. In addition to the financial support, employees help the program by offering counseling and "soft skills" training to increase students' employability and self-confidence.

Employee-Driven, Local Impact Around the World

Philadelphia Eagles Eye Mobile

The AMETEK Foundation has been a long-time partner of the Eagles Charitable Foundation including the program's expansion with Vision To Learn. The *Eagles Eye Mobile - Powered by Vision To Learn* helps children in Philadelphia get the high-quality vision care they need to succeed in life. With our support, more than 7,500 children have received free eye exams and glasses. AMETEK's Reichert Technologies has also provided the organization with advanced optometry equipment to expand its efforts in additional cities across the country.

International STEM Scholarship Program

Each year, the AMETEK Foundation provides scholarships to more than 40 students seeking a degree in STEM-related fields at selected schools in China, France and the United Kingdom. These need-based scholarships are awarded to students who have demonstrated strong academic performance, leadership and participation in school and community activities, and solid work experience. Since 2016, the AMETEK Foundation has awarded more than 160 scholarships through the program.

Promoting Childhood Literacy

Since 2002, the AMETEK Foundation has partnered with the American Reading Company to improve literacy rates among children in underserved communities across the United States. The partnership has provided more than 120,000 books to students in kindergarten through third grade — the most important years for childhood reading development. In addition, AMETEK colleagues support these efforts by reading to students and working with teachers to promote American Reading Company's 100-book challenge. These activities encourage students at an early age to make reading part of their everyday routine.

Supporting Pediatric Cancer Care in Brazil

Through the AMETEK Foundation, colleagues of AMETEK do Brasil support the Centro Infantil Boldrini (Boldrini Children's Center) in Campinas, São Paulo, Brazil. The hospital's mission is to care for children and young adults in Brazil and Latin America suffering from cancer and rare blood diseases. In addition to providing financial support, employees donate their time to visit with patients, families and staff.

OUR SOLUTIONS

Our Solutions are solving our customers' most complex challenges. At AMETEK, we invest in, develop and acquire differentiated technologies and enjoy an excellent reputation for technical innovation and next-generation product development. Many of our products provide sustainability-related benefits, and we are proud to feature several of these solutions in this report.

Our businesses partner with their customers to ensure that our solutions are constantly evolving and meeting the demands of our niche markets. These solutions are addressing some of today's most important issues, which include improving patient health outcomes, ensuring safety in the food and pharmaceutical industries, and safeguarding the environment.

Our solutions include more than just our products and services. We focus on building lasting, sustainable customer relationships based on trust, cooperation and long-term commitment. We support our customers through a global manufacturing footprint, including campuses in Mexico, China, Serbia, Czech Republic and Malaysia. These campuses are built on socially responsible processes and meet stringent environmental and safety standards, while supporting the needs of our customers. Our significant reach is further supported by a global and flexible supply chain.

Improving Medical & Health Care Outcomes

Around the world, AMETEK solutions are helping improve patient care and outcomes. The following are three select examples where our businesses are making positive impacts in the medical and health care fields.

Improving Patient Care

Rauland's Responder® solutions allow hospitals and other health care facilities to create and optimize their workflows and critical communications. These connected solutions support improved efficiency and higher levels of safety and satisfaction for patients and staff. For example, the Responder series helps nurses and hospital staff monitor patient behavior and automates the "rounding" process, or regular check-ins with patients. This process, coupled with the communication technology, promotes fall prevention as patients are more apt to contact their caretakers rather than trying to move on their own. Additionally, Rauland's bedside applications are connected with the hospital's nurse call system, so staff know when a patient is trying to leave his or her bed and can directly and immediately communicate with the patient while care providers are on their way.

Supporting Advanced Health Care Treatment

AMETEK's Engineered Medical Components (EMC) business is a leader in customized medical device interconnects, cable assemblies and leads. Its products include fine-featured components, engineered assemblies and laser-fabricated components that are used in custom solutions for a variety of medical applications. As an example, EMC's products are being used in neurostimulation, a high-focus area that helps post-surgical patients manage pain without the use of opioids, thus reducing the chance for harmful abuse and addiction.

Detecting Glaucoma Efficiently

Reichert Technologies' Tono-Pen AVIA® Tonometer is a handheld solution used by ophthalmologists and optometrists in evaluating a patient's intraocular pressure (IOP), which is an important aspect of detecting glaucoma. Reichert's technology allows for more accurate readings and is less sensitive to corneal centration, which makes it highly effective for assessing IOP following eye surgery. The handheld design of the Tono-Pen AVIA also allows for easier, more comfortable use with patients confined to beds or wheelchairs.

Ensuring Global Food & Pharmaceuticals Safety

AMETEK's high-end instrumentation solutions support sustainability.

Specifically, the following businesses offer products that protect our food supply, reduce waste and promote reliable pharmaceutical production.

Preserving Food and Reducing Waste

Water vapor, oxygen and carbon dioxide have the potential to penetrate fresh food packaging and reduce shelf life, which causes increased and unnecessary waste. Our MOCON permeation instruments help customers design better packaging by measuring the transmission rate of gases through various barrier materials. Packaging scientists are also using MOCON to design and test next-generation packaging that is compostable, recyclable, made from recycled polymer, and/or is thinner, which reduces weight and improves transportation efficiency.

Measuring Critical Moisture Levels in Medication

In order for medications to be reliably effective, accurate moisture measurement and control are critical to maximize shelf life, optimize dissolve time and ensure active ingredient effectiveness. Too much moisture can cause premature breakdown, reducing effectiveness and shelf life. Too little moisture can prevent medications from dissolving at the appropriate rate, impacting proper performance. Pharmaceutical manufacturers utilize Arizona Instrument's Computrac® line of moisture analyzers to ensure medications meet all FDA requirements and are consistently safe and effective for consumer use.

Detecting Contaminants in the Food Supply

Protecting the global food supply is one of the greatest concerns for government agencies around the world. Increased investments are being made to promote the detection of pollutants to prevent tainted foods from being distributed to the public. As an example, officials in China are utilizing highly specialized instrumentation to detect cadmium, a known carcinogen, in their rice supply. Amptek's Silicon Drift Detectors are critical components in the X-ray fluorescence spectrometers frequently used by government regulators to test foods at Chinese ports. The Amptek-enabled devices utilize digital pulses to efficiently evaluate large amounts of rice for possible traces of cadmium and are critical to ensuring the safe supply of one of the world's most popular foods.

Safeguarding the Environment

AMETEK offers a wide range of solutions that support compliance and monitoring in environmental, health, and safety applications. These featured solutions cover emissions monitoring, oil and gas pipeline security and the safety of our water supply.

Reducing Fuel Consumption and Harmful Emissions

AMETEK Process Instruments designs and manufactures monitoring equipment and instrumentation that help our customers control and reduce emissions which are detrimental to the environment. For example, the WDG-V Combustion Analyzer provides real-time information that enables operators of industrial facilities, such as refineries, power stations and petrochemical plants, to make faster, more informed decisions. With this information, operators can optimize their combustion processes to lower fuel consumption and reduce emission output. Additionally, the Continuous Emission Monitor offers precise measurement of harmful gases such as sulfur dioxide and nitrogen oxide to ensure proper environmental compliance.

Preventing Hazardous Leaks in Pipelines

In order to ensure the safe transfer of oil and gas around the world and to prevent environmentally harmful leaks, energy companies and utilities undergo routine pipeline inspections for imperfections. Creaform's Pipecheck™ solution enables non-destructive testing via 3D scanning technology to deliver reliable results when inspecting pipe integrity. Creaform's market-leading instruments provide 3D images of the pipe's surface to calculate the amount of material lost through corrosion — all while leaving the pipeline fully intact. This non-destructive method also promotes a safer environment for engineers to make appropriate decisions before removing or replacing damaged sections.

Detecting Trace Elements in Water and Wastewater

Ensuring safe drinking water and the proper treatment of wastewater is critical to the well-being of our population. Detecting trace elements plays an increasingly important role in supporting these efforts. SPECTRO's inductively coupled plasma optical emission spectrometers are widely used for analyzing water and wastewater. With their multi-element determination capabilities, high linear dynamic range and sensitivity, SPECTRO's solutions are leading the way in helping cities and utilities keep their consumers and the environment safe from pollutants in our water supply.
